

Aligning public health policies with supply chain development goals

World Health
Organization

SUSTAINABLE DEVELOPMENT GOALS

Priority areas

From the discussions at GHSC

- Shelf life policies, in terms of available remaining at shipment
- Cold chain standards
- Financial management, reimbursement for free of products
- Financing of NMRA should be reviewed e.g., perhaps a fee based structure is not working
- Improve forecast accuracy and management
- Visibility, quality and single standards for data

Priority areas

- Quality of medicines and vaccines, especially where PQ and SRA options are limited
- Regulatory harmonization, especially programs similar to the WHO Collaborative procedure offered by other SRAs
- LMIS, modernization, last mile, realistic use and expectations
- Data standards, data standards and data standards...for interoperability i.e., GSI
- Political will to uptake policies

Priority areas

- Shelf life policies, in terms of available remaining at shipment
- Cold chain standards
- Financial management, reimbursement for free of charge products
- Improve forecast accuracy and management
- Visibility, quality and single standards for data
- Quality of medicines and vaccines, especially where PQ and SRA options are limited
