Problem statement

Over 50% of Africa's population faces challenges in accessing essential medicines, due to a significant skills gap in health procurement. This gap results in inefficiencies, increased costs, and ethical concerns.

Health Procurement Africa's mission and approach

Health Procurement Africa (HPA) is dedicated to addressing the skills gap by empowering health procurement professionals with training and resources through their Knowledge Hub. The hub includes self-learning materials, case studies, workshops, and community engagement initiatives.

Key initiatives

Content development

Expanding educational resources

Community engagement

Strengthening the digital community

Technology enhancement

Migrating to an advanced e-learning platform

Workforce Development

Over 200 procurement professionals in Kenya, Nigeria and Ethiopia enrolled in our Workforce development programme taking CIPS level 4 Diploma in Procurement & Supply.

Key impacts

5-year approved forecast for 43 priority safe motherhood commodities providing funding and availability roadmap for Nigeria.

Improvement in the availability of essential health supplies with an example ranging from 72% to 85% in a supported state.

Improved HPTs availability by implementing framework agreements for supplies call off and last mile deliveries to the facilities.

Effective utilisation of allocated budget for HPTs through adoption of agile procurement methods ensuring critical supplies reach those in need.

HPA remains the centre of excellence for public healthcare procurement for a stronger and healthier Africa.

We invite you to join us in this critical mission:
